The project entitled Mobile Showroom Billing and Inventory Management is developed for established mobile showroom in the city. To manage all operations of the show room this project is developed. It will have all the basic module to manage the show room operations.

**Mobile Showroom Billing and Inventory Management System Project Synopsis**

**PROJECT:**

Mobile Showroom Billing and Inventory Management is a software application maintain the records related to purchase, sales, returns, stock updating, cash and bank flows and the reorder level of music store.

**OBJECTIVE:**

The main objective of the application is to automate the existing system of manually maintain the records of the counter sales, purchases, reorder levels, Supplier and Customer monetary positions and other related transactions made at the counter.

**SCOPE:**

This application can be used by any music store to automate the process of manually maintaining the records related to the subject of maintaining the stock and liquid flows.

**PROBLEM DEFINITION:**

The transactions related to purchase, sale and returns are maintained manually at present along with maintaining the accounts of the customers and the suppliers.

All these are to be automated and an application is required to relate all of them relatively and logically so that the current system can be replaced and accepted without major changes and problems.

The application should provide quick access to the records maintained and must reveal the important reviews about the business so that the growth can be easily compared and should provide with the various reports showing the related details so that the important decisions could be taken easily.

**Hardware and Software requirement**

**Hardware Requirement**

- **Processor**: Intel Core Duo 2.0 GHz or more
- **RAM**: 1 GB or More
- **Harddisk**: 80GB or more
Monitor : 15” CRT, or LCD monitor
Keyboard : Normal or Multimedia
Mouse : Compatible mouse

**Software Requirement**

Front End : Visual Basic 2005 Express edition
With Sql Server Compact Edition
Microsoft SDK 2.0
Or
Visual Basic 2008 Express edition
With Sql Server Compact Edition
Microsoft SDK 3.0

Back End : MS Sql Server
Operation System : Windows XP with server pack 2 Or Windows Vista

This project is readily available, to buy this project send your postal address by SMS (Mobile No 9243101428) or email (rakshainfotech@gmail.com), we will send you this project by postal VPP you can pay to the postman and collect the CD.

If you are looking for different backend please email the details. We will give this project in different backend with additional cost along with video how to change the backend, and how to use the project.

If you wish to write the whole project yourself, the option is open we can help you to design and write the project. We will make a video how to write the whole project and we will send to you, by watching that video you can able to write the project yourself. For more details please contact us.
